Updated 11-01-02

(Using Ultra-1 & Ultra-2, initially expect dizziness, or flu-like symptoms as the minerals work)
Never drink directly out of the bottle as the minerals may carry static electricity.

A/ For Symptoms of Herpes, Epstein Barr, Coxsackie, and other Viruses.

Day 1: 1/ Pour 4 oz. of **Ultra-1*** into a glass. Drink it all, not over a long period of time.
2/ **Wait** 5 minutes. This is a must! Not 1 minute! Not 15 minutes!..... FIVE MINUTES
3/ Shake the bottle of **Ultra-2***. Pour about 4 oz. into the same glass & drink quickly.

Day 2-5: 1/ **Repeat** procedure exactly as above only use 2oz of **Ultra-1** & 2oz of **Ultra-2**. Always wait 5 minutes between.

Do this until there is no more response to the minerals. Also do this weekly or monthly to clear your system of newly acquired viruses.

The bottles contain 8 oz. of water-soluble crystals in nano-size.

1 million of these minerals side-by-side would be needed to cross 1 colloidal mineral.

B/ FLU Protocol - Flu symptoms usually gone in 15 - 30 minutes.

If the flu symptoms are not gone by 30 minutes, repeat using 2oz. of each mineral.

1/ 4 oz. of **Ultra-1**

Do this at first sign of a scratchy throat!!!

Then, take 2oz. of Ultra-2. (Repeat the next day if the scratchy throat comes back.)

E/ Protocol for Symptoms of Pink-eye

1/ Put Mini-Mineral Ultra-1 into an eye-cup and hold against the eye-ball for two minutes. Do this at least 3 times per day. Takes 3-5 days for symptoms to subside depending on how long you have had pink-eye symptoms.

Help it along by putting drops of Mini-mineral Silver* into the eye several times per day.

(Symptoms of Parasites, Fungus, Worms, etc. respond better to SYCLOVIR.)

“Calcium Ions are used as the main co-enzyme to adjust the pH of digesting foods as they enter the blood stream. The body has to have an abundance of Calcium ions. If you don't have them in your body, your body will rob Calcium from your bones to get the Calcium it needs. Calcium in its purest form has a pH of 12. Calcium as a carbonate has a much lower pH than

elemental *Calcium* therefore, it does not work properly as a co-enzyme. This will explain why people can take *Calcium Carbonate* all day long while their bodies rob *Calcium* from their bone structure causing a condition known as **Osteoporosis**. *Calcium Carbonate* is black-board chalk, it's the scale that builds up on your shower wall, it gums up your swamp cooler, it does not mix with water, and tends to gum up your circulation system.... A person can have high sodium levels and never have high blood pressure if his *Calcium* levels are normal." Dr Rhett Bergeron MD

All these minerals are water soluble and approx. 1 million times smaller than Colloidal.

”Most people believe that they are getting *Calcium* when they take *Calcium Carbonate*. They are not, because the body does not have the ability to break this compound down. Every product we tested that was sold as *Calcium* on today's nutritional supplemental market stated in the fine print that it is a carbonate. *Calcium Carbonate* is also known as chalk. We looked up *Calcium Carbonate* in the CRC Handbook and discovered that *Calcium Carbonate* is not only inorganic but it is not soluble in water. This means that *Calcium Carbonate* is not found naturally in plants or animals and it will not dissolve in water for it is insoluble. Our blood is a water solution. We were totally amazed that even some instant oatmeal products were loaded with *Calcium Carbonate*.” Dr. Rhett Bergeron MD
